2027 Event Requirements for Senior Classic (Olympic & Paralympic) Australian Rowing Team

Approved & Updated Nov 2026

Please Note: Rowing Australia Limited ("RA") intends to review these Selection Requirements by no later than September of each year but may review and update these Selection Requirements at any time, including by announcing and publishing further or varied requirements and standards from time to time prior to the relevant selection event or trial and the publication or notification shall take effect in accordance with the RA Selection Policy.

Background:

The Rowing Australia (RA) National Selection Policy – Senior Team (Selection Policy) outlines the broad selection criteria for all rowers and coxswains and can be viewed on the RA website at https://rowingaustralia.com.au/national-team-selection.

This document operates as an appendix to the RA Selection Policy and outlines the activities that rowers and coxswains must complete to be eligible for selection consideration for the Australian Senior Team.

All Athletes must complete all activities stipulated in these Event Requirements unless:

- expressly provided otherwise in these Selection Requirements; or
- granted an exemption for Extenuating Circumstances in accordance with the Selection Policy.

Key Principles and Important Notes:

- If an athlete is granted an exemption from a required activity, they can still be considered for selection. However, an exemption does **not** automatically give the athlete access to extra trials, extra seat racing, or additional opportunities to enter a selected or priority boat.
- Athletes invited into a National Training Centre (NTC) must also meet all requirements set out in the NTC Invitation Guidelines.
- RA may choose not to send boats in some categories if this does not align with its performance priorities.
- RA's priority is Olympic and Paralympic success at LA 2028. For this reason:
    - non-Olympic and non-Paralympic boat classes are not a priority;
    - athletes selected as reserves for Paralympic crews may also be raced in non-Paralympic events at World Cups or international regattas;
    - lightweight athletes will only be considered in exceptional situations where there is a realistic medal chance.
- Specific lightweight requirements are outlined later in this document.
- With at least 7 days' notice, RA may schedule National Team testing and assessments even if those sessions are not listed in this document. Generally these will take place within the NTC environment.
- Crews and scullers may be confirmed at any stage during the selection process to support crew development and planning.

10) **World Rowing Championships Boat Minimum Selection Standard:**
Selectors will use testing, domestic racing and international performances to assess whether a crew is capable of meeting the standard required for LA 2028 qualification.

During the domestic season, selectors will compare crews against each other and against RA Gold Medal Times to judge their potential to reach the World Championship minimum selection standard set out below.

Boat Class (Male and Female)	Olympic Qualification Positions - 2027 World Championships (TBC)	Australian Minimum Selection Standards (TBC)
1x	10	Top 12
2x	10	Top 12
4x	7	Top 9
2-	10	Top 12
4-	7	Top 9
8+	5	Top 8
PR1 1X	TBC	Top 8
PR2 Mixed 2X	TBC	Top 8
PR3 Mixed 2X	TBC	Top 6
PR3 Mixed 4+	TBC	Top 6

During the international season, selectors will also consider:

- World Cup performances
- Australian results compared to international opponents
- other international regatta performances
- extenuating circumstances such as injury, illness or crew changes

Selectors may also consider **young senior athletes** outside these standards where appropriate.

Selectors may change the composition of a boat after World Cup I or World Cup II if they believe that change improves the boat's performance potential. If this occurs, the modified crew can still be selected for later World Cups or the World Championships.
